Hey! I'm Dmitry - CTO and Fullstack TON / Ethereum (L1; L2) / Solana blockchain dev. I love blockchain development and diving deep into development processes. I also like to understand how processes work from different sides.
Prefer stack: TON (FunC (Tolk) / js / ts) - Ethereum (Solidity / js / ts) - Solana (Rust / js / ts)

Experience:
-> June 2024 - Now | @sydefi CTO, Fullstack build on TON (smart-contract (Tolk / Solidity) + back-end(liquidator bots, admin panel, integration with other defi protocols), front-end), architecture finance model. Integrate protocol with Solana and Ethereum (smart-contracts, back-end(liquidator bots, admin panel). Own Hermes (Pyth based) oracle across the our supported chains. Trade bot for calculate optimate price for synt tokens (example: trade CEX btc / Syde syBTC).

-> June 2026 - September 2026 | @the_vertus. Build Fullstack DeFi (yield looping model) protocol (smart-contract + back-end (indexers) + front-end) on TON / HyperLiquid with cctp bridge, layerzero bridge.

-> April 2026 - July 2026 | @contoramarkets. Build Fullstack (smart-contract (Solidity) + back-end (indexers, liquidators, resolvers)) DeFi (prediction market model) on Ethereum, Base, Polygon, HyperLiquid and Arbitrum.

-> February 2026 - Fullstack build on Ethereum(smart-contract + back-end(liquidator bots, admin panel, integration with other defi protocols, front-end) + trading bots (Rust / Node) for @sydefi.

-> October 2025 - January 2026 (Part-time job) | Build core smart-contracts on TON / Ethereum and frontend for Papaya Finance (Stablecoin Subscriptions protocol, @papaya_news), Dedust X smart-contracts developer

-> October 2024 - September 2025 (Part-time job, contests, bounties) | Build NFT protocol for @sigmaconnect, Winning TON-Core Bounty for StateCheck-v2 smart-contract, Some smart-contracts building for Dedust X, Winning (5th place) Telegram x TON-Core contest first round (Trustless Bridge), DevRel at TON AI Narrative (TON Foundation), Update TON ElizaOS plugin from v1 to v2 (TON Foundation)

-> March 2024 - June 2024 | @farmix, Blockchain Dev & Team

Lead First Leveraged Yield Farming on Ton Blockhain

-> February 2024 - June 2024 | @m2fundton, Blockhain Dev m2fund-investment & asset management fund in real estate sector (RWA) on TON blockchain. -> January 2024 - February 2024 | @toncats_tg, Blockchain & Backend Dev

TON Cats is Telegram's social meme token. TON Cats aims to allow more people to enjoy Telegram and the TON ecosystem.

-> January 2024 | @nomis_protocol, Blockchain Dev The Reputation Layer for Web3.

-> November 2023 - January 2024 | Freelance work

Building Nft Collections, Nft Minters, Jettons, Locker, Vesting, Liquidation.

Skills:

-> Programming

TypeScript / Node / React (Senior), FunC/Fift (Senior), Tolk (Senior), Solidity for Ethereum and TVM Blockchains (Middle), Rust (Middle), Bash, Make, Git, Docker,

Vim/Tmux, SQL/PostgreSQL/Sqlite, Redis

-> Other tech skills

Blockchains (Like TON And Ethereum), Compilers and Virtual Machine, Network Protocols, Architect DeFi protocols (Risk Management + Finance system + Trend curator), Architect Trading bots.

-> Languages

English (B2), Russian (Native).

Thanks for your attention !
